Profile

I am currently pursuing PhD in Yoga from Ramakrishna Mission Vivekananda Educational and Research Institute, Howrah. My research is on investigating how Mind-Body Typology (Prakṛti) influences cardiac autonomic responses during practice of various Nāḍīśodhana Prāṇāyāmas. I have experience of administering Yoga protocols (involving Āsana, Prāṇāyāma, Dhyāna & Kriyā) on human subjects and measuring & analysing psychophysiological biomarkers of those practices. I am an avid seeker of the knowledge and insights in the corpus of original Yogic texts from the Hatha-Rāja Yoga traditions, integrating classical insights with scientific perspectives. I am also deeply interested in allied textual traditions such as Āgama, Vedānta and Tantra, with a focus on their convergence with Yoga and mind-body harmony.
